

Annual Return Graph

This shows the return after fund charges and tax for each year ending 31 March since the investment option started. The last bar shows the average annual return since the investment option started, up to 30 June 2023.

Important: This does not tell you how the investment option will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?*

Investors in the Lifestages Auto Option age 50 - 54 are charged fund charges. In the year to 31 March 2023 these were:

	% of net asset value
Total fund charges (estimated)	1.04%
Which are made up of -	
Total management and administration charges	1.04%
Including -	
Manager's basic fee	0.74%
Other management and administration charges ²	0.30%
Total performance-based fees	0.00%
Other Charges	
	Dollar amount per investor
Member fee	\$16.00

The percentage shown for the 'Other management and administration charges' includes an estimate of the fees and expenses incurred in the underlying funds in which the investment option invests.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'Other Material Information' document for the Lifestages KiwiSaver Scheme on the offer register (www.disclose-register.companiesoffice.govt.nz) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

** From 1 December 2022, the \$24 annual Member fee was removed. The member fee of \$16 represents the charge from 1 April 2022 - 30 November 2022. The total fund charges are expected to be 1.10% per annum in the year to 31 March 2024.

Example of how this applies to an investor

Hayley had \$10,000 in the investment option at the start of the year and did not make any further contributions. At the end of the year, Hayley received a return after fund charges were deducted of \$1,246 (that is 12.46% of her initial \$10,000). Hayley also paid \$10.00 in other charges. This gives Hayley a total return after tax of \$1,127.00 for the year.

What does the investment option invest in? ³

This shows the types of assets that the investment option invests in.

Actual investment mix

Target investment mix

Asset type	Allocation
Cash and cash equivalents	4.60%

Notes

- 1 Note that market indices reflect no deduction for charges and tax.
 - 2 This covers expenses incurred in running the fund (e.g. accounting, audit, and regulatory compliance costs). This also covers the Supervisor's annual fee (for the services it provides) and an estimate of fees and expenses incurred by the underlying funds. GST will be included in some expenses, where applicable. Our estimates are made on the basis of reasonable assumptions about the ongoing level of fees and costs expected to be charged (taking into account the actual fees and costs as a percentage of average net asset value that were charged for the most recent scheme year). These fees are deducted from, and reflected in the unit price of the fund.
 - 3 The investment option invests 80% in the Lifestages High Growth Fund and 20% in the Lifestages Income Fund. The actual investment mix, target investment mix, top 10 investments and currency hedging all reflect the assets invested proportionally in these Lifestages Funds.
- * This investment option was established in December 2022. Under the FMCA 2013 the historical returns contained in this document must reflect the disclosures that would have applied had the option been in existence when Lifestages Auto was established in 2015.
