Small differences in fees and charges can have a big impact on your investment over the long term.

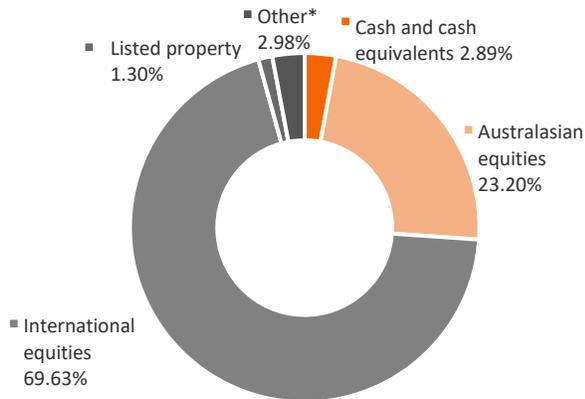

Example of how this applies to an investor

At the end of the year, Hayley received a return after fund charges were deducted of \$1,532 (that is 15.32% of her initial \$10,000). Notes

- Note that market indices reflect no deduction for charges and tax.
- This covers expenses incurred in running the fund (e.g. accounting, audit, and regulatory compliance costs). This also covers the Supervisor's annual fee (for the services it provides) and an estimate of fees and expenses incurred by the underlying funds. GST will be included in some expenses, where applicable. Our estimates are made on the basis of reasonable assumptions about the ongoing level of fees and costs expected to be charged (taking into account the actual fees and costs as a percentage of average net asset value that were charged for the most recent scheme year). These fees are deducted from, and reflected in the unit price of the fund.
